

PRINCE GARG

Full Stack Developer | System Design | Cloud Computing | B. Tech | CSE
pg3355716@gmail.com • +91 8295095069 • Gurugram • [LinkedIn: Prince Garg](#)

PROFILE SUMMARY

Java and Spring Boot developer with hands-on experience building robust backend applications, RESTful APIs, and database-driven solutions. Strong foundation in object-oriented programming and software engineering principles. with a passion for designing efficient, scalable, and maintainable systems. Skilled in workflow automation, backend optimization, and enterprise application development, with practical exposure to cloud-native technologies, microservices architecture, and distributed system design. Adept at writing clean, testable code and applying strong debugging and problem-solving skills to identify and resolve complex technical challenges. A quick learner with a strong drive to continuously improve backend performance, automate repetitive processes, and deliver reliable, high-quality software solutions.

EDUCATION

The NorthCap University <i>B. TECH(ComputerScience) CGPA:8.96</i>	May 2027
Oxford Public School XII(Grade-8.14) X(Grade-8.5)	May2023

TECHNICAL SKILLS

Frontend Framework: React | Vue | Bootstrap | JavaScript | TypeScript
Backend Framework: Java | Spring Boot (Primary) | Node.js, Express.js (Secondary)
Android Tools: Flutter | Fastlane | Firebase
Cloud Services: AWS | NVIDIA Cloud
Databases: MySQL | MongoDB | Supabase (PostgreSQL)
Deployment Tools: Docker | Jenkins | Vercel | Render
Devops: CI/CD Pipelines | Microservices Architecture | Kubernetes | Grafana | Terraform | Ansible | GitHub
Testing: Selenium | JUnit | Mockito | Postman
Enterprise & Project Tools: SAP Business Tools | Jira | Agile Workfow
Workflow & Data Management: Workflow Automation | REST APIs | Scalable System Design

EXPERIENCE

Junior Associate Intern — Mobile App Development

CCBUL Consulting LLP | April 2026 – Present

- Building a mobile application for a live client project, handling development, bug fixing, and maintenance.
- Integrated real-world APIs including Razorpay (payments) and Shiprocket (logistics/shipping) for end-to-end functionality.
- Optimized backend performance for smoother data handling and faster response times.
- Designed a smart, intuitive UI focused on usability and client requirements.
- Collaborated directly with stakeholders, including client demos and daily status reporting.

Open Source Contributor — OpenELIS Global

Google Summer of Code (GSoC) Proposal Contribution | February 2026 – March 2026

- Contributed to OpenELIS Global 2, an open-source Laboratory Information System (Java 21 + React) used by public health labs nationally, as part of a GSoC proposal.
- Submitted 3 pull requests covering frontend feature development and bug fixes — multiselect validation, dashboard widget fix, and configurable custom fields.
- Collaborated with maintainers through code review, gaining experience in open-source workflows and Git collaboration.

PROJECTS

Store Intelligence – Retail Analytics Pipeline [Link](#)

- Developed an end-to-end retail analytics platform that transformed CCTV footage into session-based business metrics including conversion rate, dwell time analysis, queue performance, and visitor funnel analytics.
- Built a FastAPI-based analytics engine with event ingestion, session management, anomaly detection, and real-time KPI computation across multiple stores and cameras.
- Implemented a YOLOv8-powered detection and tracking pipeline that generated structured customer behavior events for downstream analytics and reporting.
- Designed REST APIs, SQLite persistence layer, and automated data pipelines supporting idempotent ingestion, event deduplication, and real-time dashboarding.
- Developed a Streamlit analytics dashboard providing conversion funnels, heatmaps, anomaly monitoring, and operational insights for business decision-making.
- Containerized the complete solution using Docker and implemented health monitoring, structured logging, automated testing, and production-ready deployment workflows.

NevUp –AI System Pulse Logs [Link](#)

- Engineered a production-grade behavioral analytics platform that detects revenge trading, overtrading, emotional tilt, and trading discipline issues in real time.
- Built a scalable event-driven backend using Node.js, TypeScript, Fastify, PostgreSQL, Kafka, and Redis, enabling secure and high-performance trade processing.
- Developed advanced behavioral metrics and analytics pipelines to generate actionable insights from trader activity and emotional patterns.
- Implemented enterprise-grade multi-tenant security with JWT authentication, PostgreSQL Row-Level Security (RLS), and idempotent APIs for reliable data integrity.
- Architected a cloud-native, containerized system with Docker, Kubernetes, CI/CD automation, monitoring, and load-tested performance for production-scale deployments.

EcoGuard – AI-Powered Sustainability Platform for GitLab [Link](#)

- Engineered a multi-agent AI system to enable automated sustainability analysis and green optimization in CI/CD pipelines
- Reduced potential infrastructure waste by identifying inefficient code patterns and optimizing resource utilization
- Built real-time carbon tracking for pipelines, enabling data-driven decisions to lower CO₂ emissions
- Designed intelligent agents for workload optimization and eco-friendly deployment scheduling based on energy grid intensity
- Developed a dashboard for actionable insights into carbon footprint, efficiency, and sustainability trends
- Architected a scalable and modular system for seamless DevOps integration

AWARDS

Exploring SAP Business Technology Platform [Certificate](#)

March 24, 2026

AWS Academy Graduate – Microservices and CI/CD Pipeline Builder [Certificate](#)

March 2026

McKinsey Forward Program [Certificate](#)

December 2025

Oracle Cloud Infrastructure – Certified Generative AI Professional [Certificate](#)

September 2025

Career Essentials in Generative AI by Microsoft and LinkedIn [Certificate](#)

July 2024

AWS Academy Graduate – AWS Academy Cloud Foundations [Certificate](#)

November 2023
